

### **Tips of the day, biology**

- To excel in biology, you need to increase your writing speed. There are few tricky questions in biology. But the answers can be pretty lengthy.
- To memorise in this subject - try to make your own flowcharts and notes to organise each chapter so that it's easier to learn.
- Make sure you know how many marks each chapter is worth, and study accordingly.
- A very critical aspect of biology is diagrams. Remember to practice all diagrams well in advance.
- Remember to choose a good HB pencil while practicing the diagrams. Use the same pencil during your examination.
- You would need to focus on the chapters like taxonomy that have a lot of information and are a critical part of the syllabus.
- Attempt those questions which solution give you very intelligently.
- Your paper will have long answer questions, with one question carrying eight marks. Practice writing systematic subjective answers in point form.
- Clear all your doubts by meeting the concerned teachers well in time.
