

Tips of the day, Chemistry

1. You should divide your time according to daily tasks.
2. Do more and more practice of sample papers and model test paper with proper time management.
3. Practice all the questions from your NCERT book thoroughly. Practice intext questions as well.
4. Try to find out the main root of your problem before the examination. Why are you not confident and try to solve that?
5. The four critical things in chemistry- theory, equations, laws and problems. You need to deal differently with each aspect.
6. Focus on theory present in chapters like molecular bonding currently. You need to memories it thoroughly.
7. You need to work on the equations thoroughly.
8. Before beginning to solve the free-response questions, it is a good idea to read them all to determine which ones you feel most prepared to answer.
9. It is important to pay attention to units for quantities that have them
10. It is not necessary to simplify all numerical expressions or to carry out all numerical calculations.
