

## Tips of the day, Physics 12th class

- Physics is an interesting and scoring subject. The only need is to prepare it systematically keeping in mind the pattern of question paper.
- Divide the chapter into parts covering long questions, Short questions and numerical and then prepare each part.
- Divide long answers and numerical into steps like given data, formula used and calculation of answer.
- The question paper is totally based on NCERT and strictly according to the curriculum. Hence the NCERT book is to be considered kept as a base for preparation.
- Solve the model test papers or sample papers keeping in mind the time limit.
- Discuss the doubtful chapter with the teacher.
- While solving the numerical follow the steps as mentioned so that in case of error in calculation you can score rest of the marks.
- Always convert all given variable into SI unit and also write the unit with answer.
- While preparing for examination divide the left days according to the weightage of chapter you have to be prepared.
- Strictly complete the revision of chapters according to schedule.
- There are laws and formulas and there are problems that need to be solved based using the theory.
- It is also a good time now to practice all your diagrams. Keep practicing until you memorise them.
